Email: trihudyatmanto@unsiq.ac.id

ABSTRACT

Purpose - This study aims to see the influence of Self-Confidence, Independence and Family Environment on Entrepreneurial Interest (case study on Students of the Faculty of Economics and Business, Al-Qur'an Science University).

Method - The data used in this study was by distributing questionnaires directly to students of the Faculty of Economics and Business. The population was students of the Faculty of Economics and Business, and the sample size was set at 100 respondents, distributed using the *Proportional Random Sampling*. Data analyzed with using analysis regression linear multiple, then use test statistics descriptive, validity test, reliability test, normality test, multicollinearity test, heteroscedasticity test, and testing hypothesis covering test coefficient determination and significance test of regression coefficients.

Findings - Results study show that variables Believe Self positive influence to interest entrepreneurship student Faculty Economy University of Science Al-Qur'an, Which proven with variables believe self own t count = 5,973 with t table = 1.971896 And variable independence has a positive influence on Interest entrepreneurship student Faculty Economy University Science of the Qur'an, Which proven with variables independence own t count = 8.202 with t table = 1.971896, and the family environment has an influence on Interest entrepreneurship student Faculty Economy University Al-Quran Science, which is proven by the family environment variable, has a calculated t = 5.168 with a t table = 1.971896 and a significant value of $0.000 < 0.05$.

Keyword: believe self, independence, environment family and interest in entrepreneurship

Introduction

Interest in entrepreneurship is a tendency of the heart to be interested in creating a business and then managing, organizing, bearing the risks obtained and developing the business that one has created himself, so that the business can be more advanced and developed until it reaches success (Retno, 2013). Things that can encourage someone to be interested and willing to become an entrepreneur are curiosity, the desire to bear risks, educational factors and the students' own experience factors (Tedjasutisna, 2004: 23). The Faculty of Economics and Business, Al-Qur'an Science University, Wonosobo, has included an entrepreneurship course in its curriculum. In lecture activities, theories and practices have been provided. entrepreneurship. Based on observation beginning researchers, Still The low interest of students from the Faculty of Economics and Business at Al-Qur'an Science University, Wonosobo, class of 2024, in choosing entrepreneurship is due to a lack of interest in entrepreneurship. This is influenced by several factors, including self-confidence, independence, and family environment.

Trust self Can it is said as something belief a person regarding all aspects of the advantages he has and this belief makes him feel capable For Can reach various objective in in his life (Hakim, 2002). Self-confidence influences development mental And character they. Mental And character child A strong self-confidence will be an important asset for their future as they reach adulthood, enabling them to respond to every challenge more realistically. In other words, a child can be said to be self-confident if they dare to do something good for themselves according to their knowledge and abilities (Rahayu

Apriyanti Novita, 2013).

Independence can also be interpreted as a condition where a person does not depend on authority and does not need direction. in a way full (Parker, 2005). In life Era Now In this case, independence is related to a person's ability to carry out his responsibilities alone and seriously without assistance. person other. Matter This in harmony with opinion Erikson (Monks, (2006)

According to Conny Semiawan (2010), the family environment is the primary and primary medium influencing behavior and child development. In sociology, the term "family" is an iconic element that receives special attention. Families are considered essential as part of society in general. Individuals are formed through families, and families ultimately shape society (Abdul Latif, 2007). Alma (2013) states that environment family can influence somebody For become an entrepreneur can seen from aspect factor work person old, from person old man Work Alone and have business Alone so Their children are more likely to become entrepreneurs. The family is the closest social environment to an entrepreneur, so whether a child becomes an entrepreneur depends on their family environment, as the family plays a significant role in shaping character.

From the description, entrepreneurial interest can be achieved if a person has the confidence to face challenges in entrepreneurship and the independence to be responsible for entrepreneurial activities, as well as the family environment as the main medium for shaping one's behavior. Based on the background presented, the problem formulation in this study is the lack of entrepreneurial interest among students of the Faculty of Economics and Business, Al-Qur'an Science University, Class of 2021.

Literature Review

Interest in Entrepreneurship

Interest in entrepreneurship will also arise when someone has received a lot of information about the world of entrepreneurship. Good from experience person other and from Entrepreneurship books. Someone who is interested in becoming an entrepreneur wants to learn more about entrepreneurial activities. With increasing interest in entrepreneurship, a person will own chance For follow as well as in advancing economy self Alone and public by opening up job opportunities. Students who have a strong interest in entrepreneurship, without anyone telling them to, will with by itself do businessman For To achieve this pleasure. Interest in entrepreneurship isn't always innate, but it can be cultivated through knowledge and training. Therefore, the stronger the enjoyment of entrepreneurship, the stronger the interest. somebody in entrepreneurship. Growing interest in entrepreneurship can Also done through a number of factor including self-efficacy, independent attitude, and family environment.

Influence Believe Self

Self-confidence is belief in one's own abilities. We must have confidence that we will succeed in a task. Don't hesitate, intend to do well, and then surrender and trust in the Almighty (Buchari Alma and Donni 2009).

Research results show that self-confidence has a significant positive effect on entrepreneurial interest . On the other hand, many researchers believe that self-confidence is closely related to career development. Indarti & Rostiani (2008) stated that career confidence is a domain that describes a person's personal opinion regarding the process of career selection and adjustment, including the choice to become an

entrepreneur.

Based on the description above, the following hypothesis can be formulated:

H₁ : Believe Self influential positive to interest entrepreneurship.

Independence

Independence according to Vamer and Beamer is the possession of a value within a person that leads to maturity, so that he capable face Competition. This competition can provide the motivation to determine the best competitor. Independence is an individual's ability to manage themselves. Therefore, an independent individual is one who is able to manage themselves.

Margaretha Sulistyarini (2007) states that independence influences entrepreneurial interest. Based on the above opinion, it can be interpreted that someone with a high level of independence will be able to compete in life and independently strive to survive. This is the basis for the possibility of a significant relationship between personal independence and entrepreneurial interest.

Based on the description above, the following hypothesis can be formulated:

H₂ : Independence influential positive to interest in entrepreneurship

Environment Family

According to (Conny Semiawan, 2010), the family environment is the primary and primary medium influencing a child's behavior and development. To become an entrepreneur, the role and support of parents are essential.

Achmad Syaifudin (2016) in his research showed that that there is There is a significant positive influence between the family environment and entrepreneurial interest. This means that if the family environment influences or supports entrepreneurship, then entrepreneurial interest will increase. Conversely, if the family environment does not influence or support entrepreneurship, then students' entrepreneurial interest will decrease.

Based on the description above, the following hypothesis can be formulated:

H₃ : Family environment has a positive influence on interest in entrepreneurship.

Picture 1. Framework Theoretical

Methodology

Population

The population in this study were all students of the Management Study Program, Faculty of Economics and Business, Al Qur'an Science University, Wonosobo, Class of 2019 who were still actively studying.

Technique Sampling

The determination of the minimum sample size in this study refers to the statement of Hair *et al.*, (2018) that the minimum sample size is based on the formula 15-20 observations times the number of independent variables. In this study, 20 x 3 independent variables were taken, resulting in a minimum of 60 respondents. For optimal generalization, this study used 100 respondents.

Results Study And Discussion

Validity Test

The results of the validity test are as follows:

Table 1. Results Test Validity

Variables	Correlation Range	Significant an	Information
Believe self	0.734**-0.812**	0.000	Valid
Independence	0.693**-0.817**	0.000	Valid
Family environment	0.714 **-0.814 **	0.000	Valid
Interest in entrepreneurship	0.616**-0.742**	0.000	Valid

Source : Primary Data processed, 2022.

Based on table 1., it is known that all variables have a correlation range of 0.616 to 0.817 so that the questions in this study can be declared valid and can be used as a tool in data collection.

Reliability Test

The results of the reliability test are as follows:

Table 2. Results Test Reliability

Item	Cronchbach 's Alpha on Standardizing Items	Criteria	Note:
Believe self	0.813	> 0.60	Reliable
Independence	0.801	> 0.60	Reliable
Environment family	0.774	> 0.60	Reliable
Interest in entrepreneurship	0.779	> 0.60	Reliable

Source : Primary Data processed, 2022.

Based on table 2. above, it shows that the data obtained is reliable because *the Cronbach's alpha number* is greater than 0.6 ($\alpha > 0.6$), so that the data obtained can be declared reliable and can be used as a tool in data collection.

Test Provisions (Test F)

The results of the model accuracy test are as follows:

Table 3. F Test Results ANOVA^a

Model	Sum of Squares	Df	Mean Square	F	Sig.
1 Regression	808,289	3	269,430	255,710	.000
Residual	101,151	96	1,054		
Total	909,440	99			

Source : Primary Data processed, 2022.

Based on table 3., the calculated F value is 255.710, because if F count 255,710 > F table 1.870638. It means, in a way simultaneous there is an influence of the independent variable on the dependent variable, so that it can it is said model Which used in study This Already right or fit.

Test Multiple Linear Regression

The results of the Multiple Linear Regression test are as follows:

Table 4. Results Test Regression Linear Multiple Coefficients^a

Model		Unstandardized Coefficients		Standardize d Coefficient s	t	Sig.
		B	Std. Error	Beta		
1	(Constant)	1,691	.820		2,062	.042
	X1	.243	.041	.270	5,973	.000
	X2	.538	.066	.502	8,202	.000
	X3	.374	.072	.283	5,168	.000

Source : Data Primary, 2022

Based on results calculation obtained results multiple linear regression equation as follows:

$$Y = 1,691 + 0.243X_1 + 0.538X_2 + 0.374X_3 + e$$

The Influence of Self-Confidence (X1) on Interest in Entrepreneurship (Y)

The Self-Confidence variable has a significance value of 0.000<0.05, so Ha is accepted and Ho is rejected. The Self-Confidence variable has a calculated t value of 0.000<0.05. = 5.973 with t table = 1.971896. So t count > t table can concluded that Believe self has a contribution to the variable Interest in entrepreneurship (Y). A positive t-value indicates that the Self-Confidence variable has a positive relationship Which one way with variables Interest entrepreneurship (Y).

So it can be concluded that H1 which states that self-confidence in entrepreneurial interest is accepted.

Independence Variable (X2) on Interest in Entrepreneurship (Y)

The Independence variable has a significance value of 0.000<0.05, so Ha is accepted and Ho is rejected. The Success Variable self in business have t count = 8,202 with t table =1.971896. So t count > The t- table shows that the Independence variable contributes to the Entrepreneurial Interest variable (Y). A positive t-value indicates that the Independence variable has a direct relationship with the Entrepreneurial Interest variable (Y). Therefore, it can be concluded that H2, which states that Independence has a positive relationship with Entrepreneurial Interest, is accepted.

Family environment variables (X4) on interest in entrepreneurship (Y)

Variables Environment family own mark significant 0.000<0.05, then Ha is accepted

and H_0 is rejected. Environmental Variables family have $t_{\text{count}} = 5,168$ with $t_{\text{table}} = 1.971896$. So $t_{\text{count}} > t_{\text{table}}$, it can be concluded that the Family Environment variable contributes to the Entrepreneurial Interest variable (Y). A positive t-value indicates that the Family Environment variable has a direct relationship with the Entrepreneurial Interest variable (Y). Therefore, it can be concluded that that H3 Which state Environment family towards entrepreneurial interest is accepted.

Coefficient Determination R2

Coefficient determination used For know how much the extent to which the independent variables explain the dependent variable. The coefficient value determination located between 0 until with 1 ($0 \leq R^2 \leq 1$). The coefficient of determination value is determined by looking at the *adjusted R square value* as can be seen below:

Table. 5. Results Coefficient of Determination

Model	R	R Square	Adjusted R Square	Std. Error of the Estimate
1	.943	.889	.885	1,026

The results of the regression calculations show that the coefficient of determination obtained is 0.889. This means that 88.9% of the variation in entrepreneurial interest is due to it can be explained that Trust variable self, Independence, Family Background, Expectations, and personality while the remaining 11.1% is a contribution from factors outside this study.

Discussion

Influence believe self to interest in entrepreneurship

Based on the results of research that tested the influence of self-confidence on entrepreneurial interest, the results showed that H_0 was rejected and H_a was accepted, so it can be said that self-confidence has a positive influence on entrepreneurial interest.

Trust Self is belief on ability We must have self-confidence that we will succeed in doing a job, do not hesitate, intend to do a good job and then surrender, trust in the Almighty Power. In side other Lots researchers Which trust that self-confidence is closely related to career development. Indarti & Rostiani (2008) said that self-confidence in one's career is domain Which describe opinion a person's personality in relation to the process of career selection and adjustment, including the choice to become an entrepreneur.

This result is consistent with research by Catur Setiarini (2017) entitled the influence of entrepreneurial knowledge and trust. self to interest entrepreneurship student class xii State Vocational School 6 Muaro Jambi. There is an influence of self-confidence on the interest in entrepreneurship of class XII students of State Vocational School 6 Muaro Jambi.

Study Ermawati, Joko Widodo (2015) Also said in his research Which titled titled influence Entrepreneurial knowledge and self-confidence towards the entrepreneurial interest of class XI students majoring in marketing at SMK Negeri 2 Semarang in the 2014/2015 academic year. The results of the study showed that self-confidence had a positive and significant effect on the entrepreneurial interest of class XI students majoring in marketing at SMK Negeri 2 Semarang.

This research is also in line with research conducted by Sri rumontal Amanda Simatupang, et al., Al Washliyah Nusantara Muslim University (2021) entitled "The

Influence of Entrepreneurship Education and Self-Confidence on Interest in Entrepreneurship in the Sayurimatinggi Community, Sayurimatinggi District". regency Tapanuli south. With results research that show that trust self influential positive and significant to entrepreneurial interest

Influence independence to interest in entrepreneurship

Based on the results of research that tested the influence of Independence to Interest entrepreneurship show results H_0 is rejected and H_a is accepted so it can be said that Independence has a positive influence on Interest in Entrepreneurship.

Independence is the possession of a value within a person that leads to maturity, enabling him or her to face competition. This competition is what can provide Spirit For determine competitors best. According to Yasin Setiyawan (Bahara, 200 8) that independence Also interpreted as a state where a person can stand alone, grow and develop due to discipline and commitment so that they can determine themselves which is expressed in actions and behavior that can be assessed.

Based on the above opinion, it can be concluded that someone with a high level of independence will be able to compete in life, independently striving to survive. This is the basis for the possibility of a significant relationship between personal independence and entrepreneurial interest.

These results are consistent with research by Margaretha Sulistyarini (2007), which found that independence has a positive and significant influence on entrepreneurial interest. This study found that entrepreneurial interest can be achieved if a person has the independence to face the challenges of entrepreneurship and the independence to take responsibility for entrepreneurial activities.

Magic dawn wanto (2014) Also say in The research entitled "The Influence of Independence and Entrepreneurial Motivation on the Entrepreneurial Interest of Students at SMKN 1 Seyegan" shows that independence has an influence on the entrepreneurial interest of students at SMKN 1 Seyegan.

This research is also in line with research conducted by Kuryanti, Reny Kusuma Wati (2021) in her research Which titled Influence Independence, Motivation, and Entrepreneurship Education on Entrepreneurial Interest in Students at Duta Bangsa Campus in Wonogiri. Kuryanti, Based on the research results, it is known that independence influences the entrepreneurial interest of students at Duta Bangsa Campus in Wonogiri.

Influence environment family to interest entrepreneurship

Based on the results of research that tested the influence of the family environment on entrepreneurial interest, the results showed that H_0 was rejected and H_a was accepted. accepted so it can be said that the family environment has a positive influence on entrepreneurial interest.

According to Conny Semiawan (2010: 1), the family environment is the primary and primary medium influencing behavior and child development. To become an entrepreneur, the role and support of parents are essential. Parents' occupations can also trigger a child's interest in entrepreneurship. become like What Which person old do. For example Parents who are entrepreneurs will encourage their children to work as entrepreneurs. Therefore, parental support and role are very important in encouraging and developing interest a child For entrepreneurship. So, the more tall influence environment family so will further encourage and grow a child's interest in entrepreneurship.

These results align with research conducted by Achmad Syaifudin (2016) entitled "The Influence of Personality, Family Environment, and Entrepreneurship Education on Entrepreneurial Interest in Accounting Students at Yogyakarta State University." The results showed a positive and significant influence of the family environment. to Interest Entrepreneurship Student Program Accounting Study Program, Yogyakarta State University

Ari Widiyaningsih's (2015) research entitled The Influence of Family Environment and Entrepreneurial Motivation on Entrepreneurial Interest of Students in the Office Administration Education Study Program, Faculty of Economics, UNY. The results of this study indicate that there is a positive and significant influence of the Family Environment variable on students' Entrepreneurial Interest.

Study Which done by Deden's Research Setiawan (2016) Also mentioning influence Which The same, in His research found that the family environment has a positive influence on entrepreneurial interest. This research found that If the family environment influences or supports entrepreneurship, then students' interest in entrepreneurship will increase. Conversely, if the family environment does not influence or support entrepreneurship, then students' interest in entrepreneurship will decrease.

Conclusion

Based on results analysis study And results discussion Regarding the analysis of the influence of self-confidence, independence and family environment on entrepreneurial interest that has been carried out, several conclusions can be drawn, namely:

1. Self-confidence has a positive influence on the entrepreneurial interest of students at the Faculty of Economics, Al-Qur'an Science University, which is proven with variables believe self own $t_{count} = 5,973$ with $t_{table} = 1.971896$ and a significant value of $0.000 < 0.05$, then H_a is accepted and H_o is rejected.
2. Independence has a positive influence on the entrepreneurial interest of students of the Faculty of Economics, Al-Qur'an Science University, which is proven by the independence variable having a $t_{calculated} = 8.202$ with a $t_{table} = 1.971896$ and a significant value of $0.000 < 0.05$, then H_a is accepted and H_o is rejected.
3. The family environment influences the entrepreneurial interest of students at the Faculty of Economics, Al-Qur'an Science University, as evidenced by the family environment variable having a $t_{calculated} = 5.168$. with $t_{table} = 1.971896$ as well as mark significant $0.000 < 0.05$, then H_a is accepted and H_o is rejected.

Suggestion

Based on results analysis study, results discussion, and conclusion, so suggestion Which can given, that is:

1. Student Faculty Economy and Business University Science the Qur'an must always believe that self will success do something business and work well in increasing interest in entrepreneurship
2. Student Faculty Economy and Business University Science the Qur'an must also have a high character of independence to increase interest in entrepreneurship in order to be able to compete in life, independently trying how to survive.
3. Student Faculty Economy and Business University Science the Qur'an always promotions good communication with families who have a business background so that it is well-established, because the more communication and exchange of ideas

about entrepreneurship, the more it will increase the sense of interest in entrepreneurship.
